

Two Editors of *Climate of the Past* among EGU 2009 medalists

The European Geosciences Union will celebrate the 2009 medalists during its next meeting in Vienna. Among them are:

- Dr. Pascale Braconnot, France, renowned paleoclimate modeler, who will receive the EGU Milutin Milancovic medal of the Climate: Past, Present and Future Division for her original work on understanding the relative roles of obliquity and precession during the last interglacial period and, in particular, for her major involvement in the Paleoclimate Modeling Intercomparison Project for the Mid-Holocene.
- Dr. Eric Wolff, Great Britain, renowned glacio-chemist and paleoclimatologist, who will receive the EGU Louis Agasiz medal of the Cryosphere Sciences Division for his outstanding contributions to the study of the chemical composition of snow cover and ice cores and their use in the determination of past climates, pollution and atmospheric chemistry.

The co-editors in chief of *Climate of the Past* are proud to have such distinguished scientists in their editorial board and warmly congratulate them.
